

Odyssey - Gartner® SIEM Magic Quadrant 2024 Press Release

Odyssey repeats the triumph!
ClearSkies™ SIEM among the top 20 SIEM technology vendors in the world.

The timeless value and continuous innovation path of ClearSkies™ SIEM, an integral part of Odyssey's ClearSkies™ Threat Detection, Investigation and Response (TDIR) platform, are once again confirmed by the leading international technology assessment and advisory firm, Gartner® Inc. The just released Gartner® 2024 Magic Quadrant for Security Information and Event Management (SIEM), places ClearSkies SIEM among the top 20 **technology vendors** of the global SIEM market.

Beyond meeting Gartner's stringent qualitative and quantitative criteria for consideration and inclusion of a technology in the Magic Quadrant, Gartner's evaluation spotlights on a number of ClearSkies SIEM key strengths, which place it among the best in the world market. These include its **"Third-Party App Marketplace"** which provides improved user experience by integrating detection content and other third-party technologies. Also, the **"Extensive Product Ecosystem"** support, which integrates capabilities such as Endpoint Detection and Response, Vulnerability Management, User and Entity Behavior Analysis, Security Orchestration, Automation and Response, and Identity and Access Management among others. Particular praise is given to ClearSkies™ SIEM **"Quantity of Correlation Rules" offered out of the box, in comparison with the other vendors.** Indicatively, Gartner® prompts organizations with diverse and complex digital ecosystems to factor this specific strength into their buying decision.

Other key features highlighted by Gartner® which put the ClearSkies™ SIEM in this prestigious global group are: “The extensive Add-On Modules” offered as part of the ClearSkies™ products range, providing organizations with comprehensive security coverage, the solution’s “**Consumption-Based Licensing**” which ensures flexibility and cost-effectiveness for its clients, and last but not least, Odyssey’s “**Investment in Innovation**”, since Odyssey is actively investing in **Natural Language Processing (NLP)** and **Large Language Model (LLM)** integrations, thus demonstrating its commitment to staying at the forefront of technological advancements.

Odyssey: Driven by our core values: INNOVATION, PASSION FOR EXCELLENCE, and CLIENT FOCUS, empowered by a rich skillset and stealth code of ethics, we help clients build digital ecosystems capable of anticipating, responding, withstanding, adapting to adverse conditions, and quickly recovering from disruptive attacks while meeting compliance obligations. To ensure an attainable and sustainable cyber resilient future for our clients, we have developed a 360° Holistic Approach for Achieving Cyber Resilience, consisting of solutions, services, and product offerings classified into five pillars.

When we sailed off on our journey in 2002, we had a vision of creating something revolutionary, something that would offer real value to both our customers and our people. Gartner’s acknowledgment empowers us to keep sailing towards ground-breaking technological innovation.

Eleftherios Antoniadis, CTO Odyssey
